- Tamil

PROFILE

Passionate Frontend Developer skilled in React.js, Next.js, and Tailwind CSS, focused on building clean and responsive user interfaces. Experienced in solving real-world UI challenges and creating smooth, user friendly designs. Proficient in leveraging AI tools to enhance development speed and productivity. Eager to contribute to modern, impactful web applications as part of a forward-thinking team

PROFESSIONAL EXPERIENCE

Stigmata Techno Solution

Front-End Developer

- Working on multiple real-time frontend projects (Jan 2025–Present) using React.js, Next.js, TypeScript, Tailwind CSS, Prisma, while leveraging AI tools to speed up development and deliver high-quality, scalable UI experiences.

Junior Software developer Intern

Stigmata Techno Solutions

Chennai

- Gained hands-on frontend experience by fixing UI bugs, improving designs, and supporting testing, while strengthening JavaScript and teamwork skills.

PROJECTS

Gluby E-Auction 🔗

- Designed and developed a role-based auction platform supporting buyers, sellers, and admins with secure authentication and session management using NextAuth.js.
- Implemented real-time bidding, seller approval workflows, in-app messaging, and dynamic dashboards to deliver scalable, production-ready features.
- Built a responsive, mobile-first UI with Next.js, React, TypeScript, Tailwind CSS, Radix UI, and Framer Motion for seamless user experience.
- Developed backend services with Next.js API routes, Prisma ORM, and PostgreSQL, featuring optimized queries, route protection, and modular architecture for maintainability.

Luminary

- Developed a full-stack web app with React, Vite, Tailwind CSS (frontend) and Node.js, Express.js, Prisma, PostgreSQL (backend).

CERTIFICATES

- [HTML-For Beginners](#) 
- [CSS-For Beginners](#) 
- [JavaScript: Beginner to Expert](#) 
- [React - Complete Developer Course](#) 

INTERESTS

- Cricket
- Suttle hock
- Organizing

- Implemented secure authentication and role-based dashboards for Admin, Coach, and Parent users with tailored workflows.
- Designed modular, reusable UI components and applied custom hooks for scalable state management.
- Integrated Stripe for secure payments with real-time processing and transaction history tracking.
- Applied Zod validation on both frontend and backend to enforce input integrity and reduce runtime errors.
- Utilized Prisma ORM for type-safe queries, schema migrations, and seamless PostgreSQL integration.

Corporate Hiring

- Built a full-stack hiring system with Next.js, TypeScript, Tailwind CSS, and Prisma ORM.
- Implemented secure authentication and role-based dashboards (Admin, Faculty, HOD, Students) using NextAuth.js.
- Developed reusable UI components and RESTful APIs with optimized queries for scalable workflows.
- Added Excel/CSV import/export with validation and improved dashboard performance.

St. Maarten Tourist Survey

- Built a responsive survey platform with React, TypeScript, Vite, and Tailwind CSS.
- Implemented state management using React Context and custom hooks with data-driven survey logic.
- Added smooth UI transitions with Framer Motion and optimized builds with Vite.
- Delivered features like progress tracking, section navigation, and completion workflow.

X360

- Built a scalable React web application with modular architecture and reusable components.
- Implemented custom data tables and UI elements for dynamic data presentation and user interaction.
- Utilized Context API for efficient state management across the application.
- Integrated RESTful APIs using Axios for seamless backend communication.
- Applied TypeScript in key modules to enhance type safety and maintainability.
- Ensured responsive design and cross-device compatibility using Tailwind CSS.
- Followed best practices for code organization, error handling, and user experience.
- Collaborated on feature development, authentication flows, and dashboard interfaces.
